

CARREFOUR SPAIN COMMITS TO RENEWABLE ENERGY WITH THE SIGNING OF A CONTRACT WITH ENGIE

Madrid August 8, 2024.- ENGIE and Carrefour have signed a Power Purchase Agreement (PPA), thus reinforcing Carrefour's consumption of electricity from renewable sources. This energy purchase and sale agreement confirms the company's ambition to use 100% renewable electricity by 2030. With a duration of 10 years, the contract offers a diversified and competitive renewable supply that brings Carrefour closer to its neutrality goal of carbon while stabilizing its energy costs.

The energy supply will come from 4 ENGIE assets (2 wind farms and 2 solar parks), which represents around 180 GWh/year. This contract will contribute to achieving the objectives established in Carrefour's 2026 strategic plan, thanks to ENGIE's leadership position in the PPA market. In addition to this renewable energy consumption project in PPA mode, Carrefour continues to promote a more sustainable energy model with investment in self-consumption.

Carrefour currently has more than 280,000 m² of solar panels in 137 stores, which have led to a reduction in emissions of 19,500 tons of CO₂ so far this year. The self-consumption measures plus the PPA will account for around 40% of the annual consumption of electricity from renewable sources.

For its part, with sales of 2.4 GW of green electricity to industry and large energy consumers in 2023, ENGIE became the largest developer of renewable projects aimed at companies.

About CARREFOUR SPAIN: The distribution company is an omnichannel , multi-format and multi-brand company , which manages in Spain 204 hypermarkets, 162 Carrefour Market supermarkets , 1,079 Carrefour Express and 64 Supeco , as well as online commerce. Carrefour works on policies regarding quality, prevention, health, food safety, product safety and environmental protection and bases its CSR approach on three pillars: fighting against any form of waste, with the " Zero Food Waste " and " Zero Plastic" initiatives. "; promote the protection of biodiversity with actions aimed at recovering natural spaces and share all its environmental initiatives with the members of El Club Carrefour and its collaborators, to evolve together. All of this, with the mission of leading the Food Transition for all.

About ENGIE

ENGIE is a global reference in energy and services with low carbon emissions. With its 97,000 employees, customers, partners and stakeholders, the Group is focused on accelerating the transition towards a carbon-neutral economy, through reducing energy consumption and more environmentally friendly solutions. Inspired by its mission statement, ENGIE is committed to economic performance with a positive impact on people and the planet, building on its key activities (gas, renewable energy, services) to offer competitive solutions to its customers. Turnover in 2023: 82.6 billion euros. The Group is listed on the Paris and Brussels stock exchanges (ENGI) and is represented in the main financial (CAC 40, Euronext 100, FTSE Euro 100, MSCI Europe) and non-financial indices (DJSI World , Euronext Vigeo Eiris - Europe 120 / France 20, MSCI EMU ESG screening, MSCI EUROPE ESG Universal Select , Stoxx Europe 600 ESG-X).

About ENGIE SPAIN

ENGIE is the sixth generating agent in the country with an installed capacity of nearly 3,700 MW, including 1,700 MW of renewable assets - wind, solar and mini-hydro, and 2,000 MW of flexible and low-carbon generation. Together with its clients, ENGIE develops and manages more than 300 MW of assets that make the energy transition a reality (industrial photovoltaic or solar thermal self-consumption plants, biomass boilers and cogeneration). The company also works in marketing, trading and energy management, and is a reference agent in the structuring and implementation of long-term renewable energy purchase and sale contracts (PPAs). ENGIE is a leader in heat and cold networks at a national level (Barcelona, Zaragoza, Pamplona, Palencia, etc.) and has multiple capabilities in the conception, design, start-up and operation of industrial solutions to help its clients consume less and better energy.
